

Synthetic Traffic Dataset Construction and Non-IID Settings

(a) Base: Client Sizes

(b) Base: Window and Horizon

(c) Base: Controlled Setting

5 clients
8 traffic nodes
200 samples per client
70% / 10% / 20% split
noise std = 0.05

(d) Enhanced: Client Imbalance

(e) Enhanced: Distribution Shift

- Client 1: normal
- Client 2: student-t
- Client 3: chi-square
- Client 4: gaussian mixture
- Client 5: log-normal

(f) Enhanced: Joint Non-IID

sample-size imbalance
distribution-family shift
noise-level variation
peak-pattern variation
event perturbations
